

✓
Replace the paragraph beginning at page 14, line 27, with the following rewritten paragraph:

92) -- On the other hand, if the search window is too large, the cell delineation procedure may transition to the PRESYNC state with an incorrect reset pulse position. Figs. 9A-B show time lines representing possible results when using a window that is too large during the cell delineation procedure. Fig. 9A shows a situation where the cell delineation procedure transitions to the PRESYNC state with an incorrect reset pulse position and immediately transitions back to the HUNT state, while Fig. 9B shows a situation where the cell delineation procedure transitions to the PRESYNC state with the correct reset pulse position. Except for a slight increase in time to enter the SYNC state, when proper values are used for ALPHA and DELTA, the cell delineation procedure of Fig. 6 guarantees eventually finding a correct reset pulse position, even after several state transitions between the HUNT and PRESYNC states. --

REMARKS/ARGUMENTS

Claims 1-10 are pending in the application. The Specification has been amended to correct inadvertent typographical errors that remained from a draft of the application in which the three graphs of Fig. 9 were labeled as Figs. 9(A)-(C), rather than as Figs. 9(A)-(B) as filed. The Applicant hereby requests examination of the application in view of the foregoing amendments.

AUTHORIZATION TO CHARGE DEPOSIT ACCOUNT

The Commissioner is hereby authorized to charge payment of any additional fees required under 37 CFR §§ 1.16 and 1.17 which are associated with this communication or credit any overpayment to **Lucent Technologies Inc. (Account No. 12-2325)**.
